

# COLLABORATORIUM

co / labor-at / orium = together / work / in an open location

## Why Collaboratorium?

Our Collaboratorium is a place to learn about and share health innovations that are being nurtured within McMaster University, and we've designed a series of talks to introduce you to new academic content, pique your interest in new pedagogies, and highlight projects underway in health innovation.

By collaborating and working together in an open space, we commit ourselves to creating an environment of discovery and ideation in which ideas and research are validated, shared and debated.

**When?** Collaboratorium Talks take place at **12 noon to 1:30 PM** on the first Tuesday of each month.
